

2025 Edition

Roam Overland

Custom Campervan Builders

What we do? We build

Cozy, Cool, and

Stylish Campervans...

Our Build Process is Easy

> Help us understand your needs and budget.

Share your wishlist and inspiration pics with us, and we'll give you a quick estimate to turn your dream van into reality!

> Anchor your build date with a \$1500 deposit

Once you're ready to lock it in, let us know! And hey, we're not just holding onto your dough for fun. This deposit goes straight towards your first invoice and gets the design gears turning.

> Where the fun begins...design concept, renderings, and a precise, detailed estimate.

If you're building our standard floorplan The Mesa, this step has already been done for you!

> Drop your van off!

Once we've got the design and costs down pat, we'll invoice for the special order items and set the wheels in motion for your van's delivery.

What do we do?

Build Campervans

The Mesa

\$45-65k

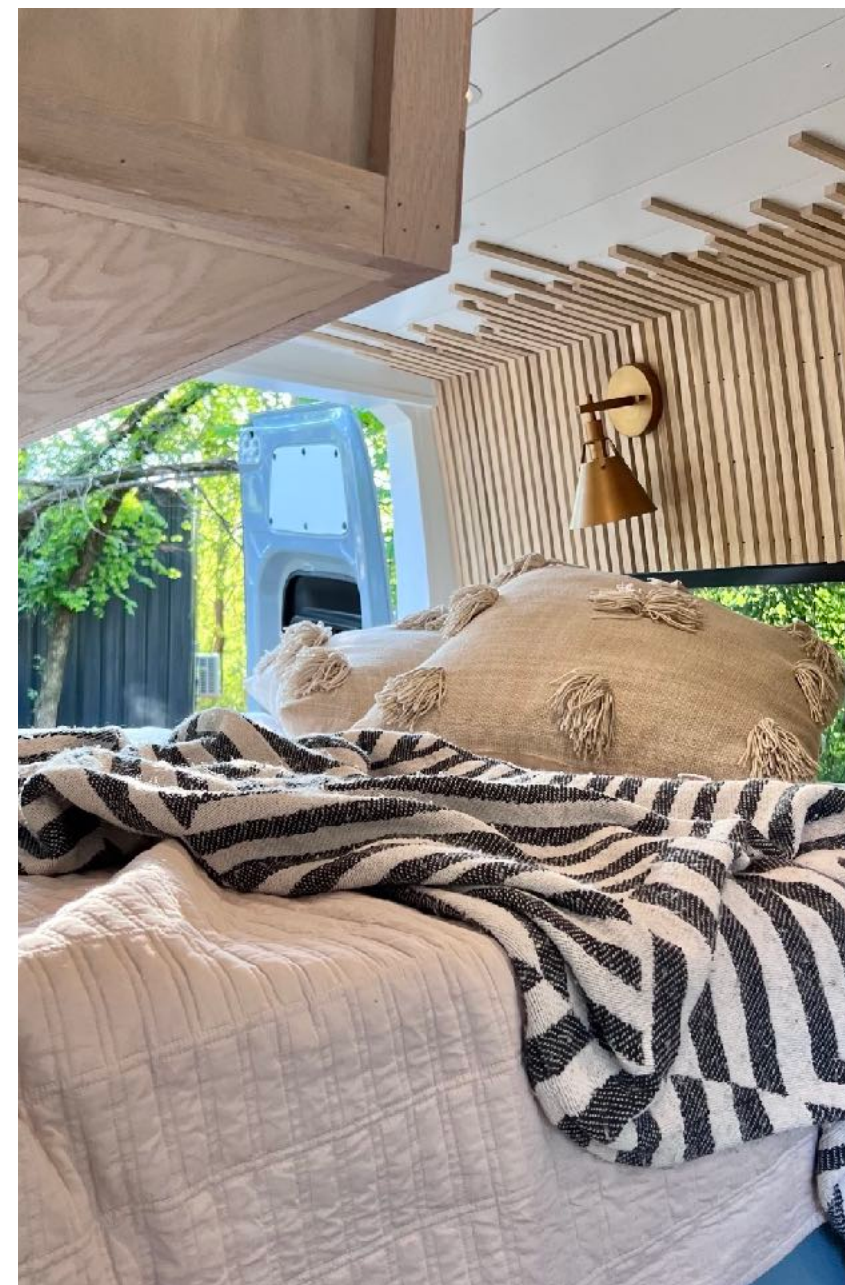

The Mesa is our only model that is not custom, however there are a few upgrade options.

Custom Mid Range

\$55-85k

Fully custom and freedom to design this however you want... Our custom builds start at \$55k with an RV style power system (on grid). Off grid starts at \$65k.

Custom High End

\$85-150k

Luxury custom campervan with all the bells and whistles and extensive exterior and interior upgrades.

What do we do?

Build Skoolie's and Restore Airstreams

Airstream Renovations

\$2k-6k Linear Foot

Fully custom renovations and restorations of interior and exterior vintage airstreams.

Skoolie Conversions

\$2k-6k Linear Foot

Fully custom and freedom to design this however you want...

The Mesa

\$45,000+

We've created the perfect high end campervan, without the high end price tag. Imagine a cozy, chill, and stylish home on wheels. Mesa is the perfect blend of comfort and high-end design.

A lot to give, a lot less cost...

starts at **\$45,000**
in your van

Designed to be built on a newer model
Promaster 159 Ext High Top

Off Grid Power Systems

Hidden in Floor Shower \$1400

120v Bosch Hot Water Heater \$800

Grey Water Tank \$1450

Swivel Seat \$700

Lagun Swivel Table \$900

Skylight \$2500

> Same specs as a custom build, how is it cheaper?

It's built to go in one van only, the Promaster 159 Extended. There are no design options, which reduces our upfront design time, decreases the amount of time to build (we've done it more than once!), reduces the time for trial and error we have with a full custom buildout, reduces warranty work, and allows us to purchase the items at deeper bulk discounts.

The off grid power bank and controls (although very robust!) uses less components, and components that are more cost effective than our fully custom systems.

Our luxury high end customs have an A grade finish (the best of the best). The Mesa has a B/C grade finish. What does that mean? To most, you'd never know the difference, as the Mesa is still a very well built and stylish campervan (peep the image on the right)! Level A grade finish would include flexible adhesive between every wood component and the metal, and between all wood to wood contact points, it has a sprayed on candy shell paint finish - which requires less touch up, tolerances between cabinets are very tight and almost invisible to most. Level B/C grade finish reduces the amount of adhesive used, used a rolled on paint finish, and the tolerances between cabinets are more visible.

Mesa Gallery

\$45,000+

Shown with upgraded skylight. Upgrades in this van that are not visible in image, 24v Air Conditioner, 12v Air Heater, Windows. Built for \$58,000 in 2025.

The Custom

\$65,000-85,000
